<u>DETAILED ACTION</u>

Claim Objections

1. Claim 19 is objected to because of the following informalities: "lest" (L 6) should be "least". Appropriate correction is required.

Claim Rejections - 35 USC § 112

- **2.** The following is a quotation of the second paragraph of 35 U.S.C. 112:
 - The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
- 3. Claims 1-33 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
- **Claim 1**, "1-4" (both occurrences, line 13) renders claim 1 indefinite because it is not clear what is encompassed therefrom. Also, claim 1, "of the wing" of the chassis (L 13-14) lacks antecedent basis. Also, see **claim 19**, lines 11-12.

Allowable Subject Matter

- 4. Claims 1-33 would be allowable if rewritten or amended to overcome the rejections under 35 U.S.C. 112, second paragraph, set forth in this Office action.
- **5.** As allowable subject matter has been indicated, applicant's reply must either comply with all formal requirements or specifically traverse each requirement not complied with. See 37 CFR 1.111(b) and MPEP § 707.07(a).

Application/Control Number 09/891,976 Art Unit 1734

6. The following is a statement of reasons for the indication of allowable subject matter: the prior art of record to Roessler et al. do not teach attaching a plurality of landing zones in spaced apart relationship on one surface of the web, attaching at least one wing tab on the edge of the web, and longitudinally folding the web in a generally Z-fold configuration and forming a releasable bond on the longitudinal fold where landing zones are defined in the specification as strips of material having adhesive thereon.
